

LOA WITH CENTRAL TEXAS WATER SUPPLY CORPORATION

RS-22-168

November 29, 2022

Project Background

2

- City of Killeen (COK) has a twelve-inch water transmission main that ties into the Central Texas Water Supply Corporation (CTWSC) system at Chaparral Road/FM 195 pump station.
- In September 2022, CTWSC encountered system failures at their water treatment plant on Stillhouse Hollow Lake and requested assistance with treated water from the COK main at the pump station.
- Since that time, CTWSC was able to fix the failures and no longer require assistance for this event.

Project Background

3

- COK and CTWSC realize the need for an agreement that allows either entity to sell treated water to the other in the event of an emergency.
- The letter of agreement outlines the details for the sale of treated water in the event of an emergency by either entity to include notification requirements, costs, and limits.

Alternatives

4

- ❑ Do not authorize the LOA with CTWSC.
- ❑ Authorize the LOA with CTWSC for the sale of treated water by either entity in the event of an emergency.

Recommendation

5

- City Council authorize the City Manager, or designee, to execute a Letter of Agreement with Central Texas Water Supply Corporation for the sale of treated water by either entity in the event of an emergency.
