1 EXECUTIVE SUMMARY

1.1 OVERVIEW

The City of Killeen Solid Waste Master Plan and Rate Study (Plan) was completed in 2015 and included recommendations for the future management of solid waste in the City. One recommendation from this effort was to perform a more detailed analysis to further evaluate the feasibility of the development of a material recovery facility (MRF) that would be joint effort between the City of Killeen and Fort Hood. The MRF would establish a recyclables processing facility to serve the Centex Sustainable Partnership Cities as well as other entities in the region. This feasibility study provides a more detailed overview and analysis of the MRF that would be developed by the City and operated by Fort Hood. This study includes estimates of potential recyclable quantities, projections of revenue and an analysis of development and operating costs for the facility. This study includes consideration of notable changes in the marketplace for recovered products as compared to the 2015 study. Conclusions and Recommendations are included based on the analysis.

The study was performed for the City with the cooperation and input from Fort Hood and neighboring cities. Meetings were held in Killeen that were attended by potential users of the facility including Harker Heights, Copperas Cove and Fort Hood. These meetings were conducted to determine key information that could be used in the ensuing analysis. The Plan provides the City with a roadmap for the continued improvement and sustainability of the solid waste system that serves the citizens and businesses within the City of Killeen.

1.2 QUANTITIES AND SERVICE AREA

The potential service area for the MRF includes the Killeen / Fort Hood MSA that includes Temple and Belton. This area has an approximate population of 427,000 people and produces approximately 350,000 tons of MSW annually. The prospective MRF participants initially will include the following cities and entities:

- Killeen: The City is considering the termination of its subscription recycling service and replacing the program with a citywide curbside recycling program.
- Fort Hood: Fort Hood has an active curbside residential recycling program as well as commercial and industrial recycling. The Fort has been processing recyclables for distribution at the Fort Hood Recycling Center.
- Copperas Cove: Copperas Cove provides recycling services to their residents and is in the process of implementing a single stream curbside collection program. Collected materials are hauled to a private processing facility located near Austin.
- Harker Heights: The City has a drop-off facility that is utilized by citizens and is considering curbside recycling service.
- Gatesville: Provides citizens with a recycling drop-off center for recyclables.

Other cities and entities may utilize the facility in the future depending on contractual arrangements with solid waste service providers.

1.3 FACILITY PLANNING

The proposed MRF will be located on vacant land adjacent to the City of Killeen Transfer Station inside the limits of the permitted area of the closed landfill. The facility would be designed to process up to 10 tons per hour of recyclables with the ability to expand the processing to accommodate another 8-10 tons per hour in the future. The following are key considerations in the development of the initial phase of the MRF:

- 44,800 sf MRF building for receiving and processing materials
- The proposed MRF would initially process plastics, metals, OCC, and paper. In view of the current market dynamics and related cost considerations, glass would not be included in the initial recyclables stream.
- Offices for administrative and support facilities would be included.
- Existing scale facilities at the transfer station would be used for the recycling trucks.
- Utilities with the exception of sanitary sewer are present at the site.
- The site is located in an area of the landfill not previously used for waste placement.

1.4 CONCLUSIONS AND RECOMMENDATIONS

The following conclusions and recommendations are presented as a result of the MRF feasibility study.

CONCLUSIONS:

- The estimated cost to develop the proposed MRF at the City's transfer station is approximately \$11.8 million.
- The estimated annual operations and maintenance costs for the MRF will very likely exceed the projected revenue from sales of materials in the first five years of operation.
- The potential for increased revenue in the future is substantial given the available waste stream in the region and recent pricing of some materials.

RECOMMENDATIONS:

1. Determine based on the financial analysis and other factors, if the City and Fort Hood want to continue pursuing the construction and operation of a regional MRF
2. Apply for the Defense Economic Adjustment Assistance Grant Program (DEAAG) from the State in the spring if the intent is to move forward with development.

3. Update the financial analysis after the grant process and additional input from surrounding cities.
4. Further refine institutional arrangements for the operation of the facility. Consider developing a revenue/cost sharing agreement for the MRF with Fort Hood.
5. Review the implementation of curbside recycling to determine the cost impact to customers if implemented.
6. Consider implementing a limited commercial recycling program as an alternative to residential curbside recycling to enhance revenue with limited capital investment.

2 INTRODUCTION

2.1 PURPOSE AND SCOPE

The City of Killeen authorized SCS Engineers to perform a feasibility study for the development and operation of a MRF that would be constructed at the City's closed landfill and operated by Fort Hood personnel. This feasibility study (Study) provides a more detailed analysis of the financial viability of this project that will include the development of cost estimates to develop and operate the facility, projected revenues from the sale of recyclables and potential funding sources for the project. The Study also identifies and discusses potential institutional arrangements for ownership and administration of the facility. Conclusions and recommendations are presented for the development and operation of the MRF along with pro-forma analysis.

2.2 BACKGROUND

This Study is the result of the recommendations made in the Master Plan that was recently completed through the cooperative efforts of SCS Engineers and the City. The City had previously initiated discussions with Fort Hood and other cities during the planning process and committed to performing a more detailed study of the feasibility of the development and operation of a regional MRF that could serve the CenTex region. Fort Hood also performed a study in 2011 that investigated the feasibility of regional recycling efforts for the Fort and Cen-Tex Cities. That study was conceptual assessment of the potential to develop regional recycling programs.

2.3 PARTICIPANTS

The City of Killeen Solid Waste Division staff provided data and input into this Study along with review and comment throughout the development of the Study. SCS Engineers developed the recommendations as well as all the pro-forma economic analysis.

An initial meeting was held at the City that included participants from Fort Hood and surrounding communities of Harker Heights and Copperas Cove. The meeting included an initial planning-level discussion regarding the potential for a regional MRF for the City, Fort Hood, and area cities.

Additional meetings were held with City staff and Fort Hood to discuss technical issues, assumptions and grant funding.

2.4 COORDINATION

The Study involves close coordination with the City of Killeen and Fort Hood who would be the primary entities involved in development and operation of the MRF. Coordination with CenTex partnership cities was part of the process as well. SCS provided a briefing including solicitation of input from member cities regarding the MRF and potential grant funding. SCS is also in contact with the CENTEX COG and state regarding available funding opportunities. If the City decides to proceed with development of a MRF, it is recommended that the City inform the

regional planning authority regarding future plans that may impact future regional planning updates. The Centex Sustainable Communities Partnership will be included in future coordination activities as well.

2.5 REGIONAL RECYCLING ACTIVITIES

The City of Killeen currently has a subscription recycling service that provides curbside recycling to residents for a monthly fee. This program will be phased out soon due to the cost to maintain these services and process the materials.

Fort Hood Recycling Center receives recyclables from the residential housing units as well as recyclables from non-residential areas within the installation, and operates a recycling program on the post that includes a recycling facility

Copperas Cove is in the process of implementing single stream curbside recycling for their citizens. Materials are collected and transported to a processing facility located near Austin that is operated by a private company.

Other cities in the region are in the process of assessing the feasibility of providing curbside recycling service to the residents. The outcome of this Study will likely be a factor in the process of determining whether communities pursue a curbside recycling program. Exhibit 1 provides a brief summary of current recycling programs for Killeen, Fort Hood and adjacent cities.

Exhibit 1. Current Recycle Programs

Recycling Programs					
Program Component	Fort Hood	Killeen	Copperas Cove	Harker Heights	Gatesville
Sector	Residential and Some Commercial	Residential and Some Commercial	Residential and Some Commercial	Residential	
Collection	Residential via private contract. Commercial via Fort Hood Crew	Manual Source-sorted Curbside	Single Stream Pilot	Manned Recycling Center	
Collection Frequency	Daily/Weekly	Once Weekly	Twice Weekly	N/A	
Residential Curbside Container	None	City-provided bins		None	None
Participation	Mandatory. Rate is not available	Subscription Service	Service provided to all households. Pilot Single Stream Program Implementation Phase	Varies	Unknown
Equipment	Collection vehicles, modular trailer, OCC baler, paper baler, conveyors, dumpsters, carts, bins	Collection vehicles, modular trailer, OCC baler, dumpsters, carts, bins	Collection vehicles, modular trailer, OCC baler, dumpsters, carts, bins	None	None

3 RECYCLABLE QUANTITIES AND SERVICE AREA

3.1 PRIMARY PARTICIPANTS AND QUANTITIES

The primary participants for the development and operation of the MRF would be the City of Killeen and Fort Hood. Fort Hood plans to haul the curbside recyclables collected from residential units as well as some non-commercial recyclable materials to the new MRF. The Fort would maintain their existing recycling facility to process some metals and selected commercial materials. The City of Killeen would implement a single stream curbside collection program to collect recyclables for delivery and processing at the new MRF. Other cities that have expressed intent to bring their recyclables to the MRF include: Harker Heights, Gatesville and Copperas Cove. Copperas Cove is currently collecting recyclables in a single stream curbside collection program.

Estimated recyclable quantities are listed in Exhibit 2. Killeen estimates were derived from the waste quantity projections developed for the plan. Recyclable quantities for the other cities have been estimated based on waste generation rates for the region. The estimated composition of recyclables was derived from recent waste composition estimates for cities within the region. SCS assumed a 12% recycling rate for residential msw. These initial estimated quantities were used in the analysis presented in Section 5 of this Study.

Exhibit 2. Estimated Recyclable Quantities for Cities

Recyclable Materials	% of Total	Annual Tonnage		
		Killeen	Copperas Cove	Harker Heights
OCC	20%	1248	481.6	409.6
Mixed Paper	45%	2808	1083.6	921.6
Plastic	5%	312	120.4	102.4
Wood	5%	312	120.4	102.4
Ferrous and Nonferrous Metal/Cans	5%	312	120.4	102.4
Glass and Residual	20%	1248	481.6	409.6
Total	100%	6240	2408	2048

The City of Gatesville quantities are included with the Fort Hood estimated quantities which are presented on Exhibit 10.

3.2 ADDITIONAL PARTICIPANTS AND QUANTITIES

The estimated recyclable quantities are based on the participants that have indicated their intent to utilize the regional MRF if it is developed. Other potential participants include the cities of Belton, Temple, Nolanville and unincorporated areas of the region. At this time, we are not including additional entities in the material quantity estimates to avoid overstating the initial material quantities that would be available for the new MRF. Future growth will be considered in the sizing of the facility in order to accommodate additional cities.

Waste composition estimates for the study were taken from the Killeen Master Plan and Fort Hood Recycling Study as well as current quantities received by Fort Hood. Total quantities for the cities were derived by estimating waste generation rates and assuming a 12% recycling rate.

Materials that will be processed include: paper, plastics, OCC, ferrous and non-ferrous metals and residue. Some wood materials may be received and separated for use at the composting facility. It was decided in discussions with the City and Fort Hood that glass would not be recycled due to its low value and difficulty in processing. Exhibit 3 presents estimated waste composition for Killeen from the Master Plan.

**Exhibit 3. Estimated Average Single-Family Waste Composition
(SCS Study from 13 Municipalities)**

Material Components		Average Residential Composition	Average Residential Tonnage (Killeen, 2012)
Recyclable Curbside	Corrugated Cardboard	2.5%	2,348

Total Non-Divertible		26.8%	25,497
TOTAL		100.0%	95,000

4 FACILITY PLANNING

4.1 LOCATION DESCRIPTION OF FACILITY

4.1.1 Facilities

The proposed MRF will consist of a main processing building that will receive and process the recyclables and separate administrative offices with employee sanitary facilities. The proposed improvements are summarized below:

- 44,800 sf metal building for receiving and processing recyclable materials
- Recycling sorting system with baler
- 6400 sf administrative offices located adjacent to the MRF Building
- Concrete paved entrance road and truck parking and maneuvering areas
- Utilities to support the equipment and building needs
- Mobil equipment and trucks

The proposed MRF building is sized to accommodate the processing equipment and tipping floor area. The building is sized to accommodate future growth as quantities increase. Exhibit 5 is a site plan that provides a layout for the facility. The processing building will have a minimum clear height of 30 feet. The proposed structure is a pre-engineered type with metal arch framed supports with metal wall and roof panels to provide interior clear span for full use of floor space. No interior heat or air conditioning is proposed. The MRF building will have large roll-up doors for collection vehicles to enter and unload. A separate loading dock area would provide loading for baled materials.

The recycling sorting system layout is shown in Exhibit 6. This proposed configuration was prepared by CP Manufacturing (CP) in response to an RFI document prepared by SCS Engineers. The layout provides an overview of the sorting system operation. The sorting system proposed will handle the initial quantities of materials planned for the MRF and anticipated future quantities. The 10 tons per hour (tph) capacity can be expanded later to accommodate growth. At this time, an optical sorter for plastics is not included due to the cost of this additional equipment. Photographs of a similar sized system recently installed by CP are included in the appendix.

The levels of personnel estimated for the MRF are:

- 12-14 Sorters
- 5 Operators
- 5 Administrative Personnel

These estimates are derived from input from the equipment manufactures and Fort Hood as well experience with similar facilities.

The proposed administrative offices are shown in Exhibit 5. The office space will include a shower and restrooms, offices and meeting room. The square footage is an estimate based on the

number of administrative staff and employees. The actual floor plan and final size of the office area will be determined during the detailed design phase.

The concrete entrance and exit drive along with paved loading and approaches are shown on Exhibit 5. Collection trucks would use the existing transfer station scales located near the proposed entrance. The entrance location off of the existing main access road may need some adjustment to avoid traffic conflicts with the transfer station traffic.

Utilities included for this cost estimate include water, septic and electrical service. Drainage is assumed to be handled with surface flow and erosion protection.

Mobil equipment includes a front end loader, fork lift, trash roll-off and trucks. These are depicted in the Exhibit 6.

4.1.2 Location

The proposed location of the MRF is the City's closed landfill adjacent to the existing transfer station. The location was selected based on discussions with the City and Fort Hood as well as appropriate engineering selection criteria for solid waste facilities based on SCS' past experience. Highways 190 and 195 provide appropriate roadway access for potential users and close proximity to the transfer station, thereby limiting the cost of residual disposal. The site within the landfill preliminarily selected for development is located west of the main landfill entrance road near the scale house. The site is entirely outside the limits of waste for the closed landfill. Site preparation will not require imported fill or substantial excavations to achieve final grades. Utilities are nearby due to the transfer station construction that was performed in 2006 and 2007. In view of such desirable characteristics, the site appears to be favorable for development and operation. The final site selection will be confirmed prior to performing the final design on the facility.

5 FINANCIAL ANALYSIS

5.1 PRO FORMA MODELING

Estimated costs to build and operate the proposed MRF were developed using equipment manufacturer input and SCS experience with solid waste processing facilities. Results are presented in Exhibits 8-12. The analysis is presented for a five-year period beginning in 2016. Assumptions and complete pro forma are included in the Appendix A.

Based on SCS' review of the various preliminary design, the capital cost to construct the MRF is estimated to be \$11,835,000. This assumes no cost for the land. Annual O & M costs are estimated to be \$1,324,000. Potential revenues are estimated to be in the range of \$1,130,000, initially. Revenues may be highly variable depending on the commodity markets and quality and composition of the material. SCS' analysis illustrates that the facility would likely operate with a negative cash flow based on the assumptions. Future growth and commodity prices may improve this outlook. Debt service estimates were calculated under two scenarios: assuming no grant funding and assuming a maximum funding of \$5,000,000.

5.1.1 Capital Costs

Capital Costs are estimated from similar sized facilities in 2016 dollars. MRF equipment cost includes basic sorting system with baler, but does not include optical sorter or glass handling equipment. Site work is based on the Exhibit 5 Site Plan. Utilities include water, sanitary sewer/septic and electrical service. Building costs assume facilities described in Section 4. Mobil equipment includes front end loader, fork lift and roll-off containers and truck.

Exhibit 6. Capital Costs

MRF Capital Costs	Year				
	FY2016	FY2017	FY2018	FY2019	FY2020
Site Preparation	\$51,150	\$0	\$0	\$0	\$0
Earthwork	\$51,150	\$0	\$0	\$0	\$0
Utilities	\$184,140	\$0	\$0	\$0	\$0

Engineering/Testing	\$491,040	\$0	\$0	\$0	\$0
Contingency (15%)	\$1,543,707	\$0	\$0	\$0	\$0
TOTAL	\$11,835,087	\$0	\$0	\$0	\$0

5.1.2 MRF Operations and Maintenance Costs

The MRF personnel estimates assume 13 sorters, 5 operators, and 5 administrative personnel. Maintenance costs were estimated with input from equipment manufacturers and SCS experience.

Exhibit 7. O & M Summary

MRF O&M ¹	Year				
	FY2016	FY2017	FY2018	FY2019	FY2020

5.1.4 Cost Summary

Exhibit 11 provides estimated annual cost summary for MRF development. Annual cost totals are included for a scenario that includes a \$5,000,000 grant from the state and a scenario without any grant funding. Capital costs are amortized over a 20 year period at an interest rate of 3.5%.

Exhibit 10. Summary of Revenue and Cost Estimates

MRF Summary	Year				
	FY2016	FY2017	FY2018	FY2019	FY2020
O&M	(\$1,336,918)	(\$1,367,667)	(\$1,399,124)	(\$1,431,304)	(\$1,464,224)
Debt Service (W/O Grant)	(\$832,729)	(\$832,729)	(\$832,729)	(\$832,729)	(\$832,729)
Revenue	\$1,062,750	\$1,100,937	\$1,140,506	\$1,181,505	\$1,223,988
TOTAL	(\$1,106,898)	(\$1,099,460)	(\$1,091,348)	(\$1,082,528)	(\$1,072,965)
Debt Service (W/ Grant)	(\$480,924)	(\$480,924)	(\$480,924)	(\$480,924)	(\$480,924)
TOTAL	(\$755,093)	(\$747,654)	(\$739,542)	(\$730,722)	(\$721,160)

The Pro Forma analysis of the MRF indicates that the potential revenue from material sales will be less than the annual O & M costs based on current commodity pricing. This may improve in the future as commodity pricing recovers. Debt service costs vary depending on the level of grant funding. Based on the revenue estimates, the annual deficits range from \$755,100 to \$1,106,900.

5.1.5 Curbside Collection Cost Summary

Curbside recycling costs were updated from the analysis performed in the Master Plan and Rate Study. Avoided costs of transfer and disposal are included in the totals. As summarized in Exhibit 12, these costs indicate additional annual costs of \$1,500,000 will be required in the first year of operation to implement curbside collection of recyclables on a once every two week schedule.

Exhibit 11. Curbside Collection Costs

Curbside Collection Costs	Year				
	FY2016	FY2017	FY2018	FY2019	FY2020
Equipment O&M	\$252,000	\$257,796	\$263,725	\$269,791	\$275,996
Labor	\$220,646	\$225,721	\$230,913	\$236,224	\$241,657
Truck Amortization	\$333,667	\$333,667	\$333,667	\$333,667	\$333,667

City Administrative Overhead - Single	\$428,785	\$433,134	\$437,582	\$442,133	\$446,788
City Administrative Overhead - Multi	\$549,555	\$554,447	\$559,451	\$564,571	\$569,808
Total Expenses - Single Cart Program	\$1,550,748	\$1,567,118	\$1,583,863	\$1,600,994	\$1,618,519
Total Expenses - Multi Cart Program	\$1,820,788	\$1,837,701	\$1,855,002	\$1,872,702	\$1,890,809
Avoidance Costs ¹	(\$237,120)	(\$245,727)	(\$254,647)	(\$263,890)	(\$273,469)
Total Expenses - Single Cart Program	\$1,313,628	\$1,321,390	\$1,329,216	\$1,337,104	\$1,345,050
Total Expenses - Multi Cart Program	\$1,583,668	\$1,591,973	\$1,600,356	\$1,608,812	\$1,617,340

1 - Based on a \$38/ton disposal fee, City of Killeen's Throughput, 1.3% growth, and 2.3% inflation.

The rate impact of implementing a single-stream recycling program in conjunction with the development and operation of a regional MRF will depend on several factors. Revenue, cost sharing, grant funding and changes to current recycling programs will all have an affect the future monthly rates. Based on assumptions in this analysis residential rates will need to increase in the range of \$2 to \$3 per month to cover the anticipated additional cost of curbside collection and processing of the recyclables.

5.2 FUNDING

Funding for the facility includes potential grant money available from the State. The largest potential source of funding is provided by the Defense Economic Adjustment Assistance Grant. This program is set up to provide funding for projects that involve military installations in Texas facing economic impacts resulting in job loss or disruptions in the facilities. The Regional MRF project appears to be well-positioned to pursue grant funding given the involvement of municipalities and Fort Hood. The next application period is in April 2016. The City should determine if they are interested in pursuing these funds. A maximum potential for funding on this project would be \$5,000,000

Other sources of potential grant funding include the CENTEX COG. The COG provides limited funding annually for solid waste projects in the region. Annual funding for grant projects vary, but are generally in the range of \$100,000. This may be a good source for funding small equipment or containers.

The EPA provides grant funding for recycling programs under the Pollution Prevention grant program. These grants typically range from \$20,000 to \$120,000. These funds are used primarily for technical assistance training and outreach.

Information on the grant funding programs is included in Appendix C.

Funding for the capital improvements after the grant funds are considered would most likely be municipal bonds. Debt service calculations for the financial analysis assume an interest rate of 3.5% for a term of 20 years.

6 INSTITUTIONAL ARRANGEMENTS

The Regional MRF would be developed and operated by the City of Killeen and Fort Hood. One possible arrangement to accomplish this would be an inter-local agreement between the two entities. Other cities committed to the use of this facility may also be part of the agreement. Roles and responsibilities of the parties need to be clearly defined to avoid future conflicts. These include:

Development of the Facility: Who will assume the responsibility for the capital costs to develop the facility?

If Fort Hood provides personnel, who will absorb potential shortfalls in years that the facility operates at a loss? How will the losses be distributed among the participants?

Are other entities willing to assume some responsibility for these costs?

Another possible organizational structure for this project would be to establish a new solid waste authority. The State of Texas allows the establishment of authorities that will manage solid waste. Examples of these types of structures include TASWA in north Texas and BVSMA in southeast Texas, which own and operate landfills. Authorities are established by acts of the legislature and have elected boards that serve specified terms. These authorities have authority to establish fees and borrow money for solid waste projects and services. This approach may not be practical for this project but could be considered as an alternative to an inter-local agreement.

An integral part of any agreement between participants will be the revenue/cost sharing agreement. Based on the pro forma analysis there is likely to be annual net costs for the MRF that need to be covered by the primary participants.

7 RECOMMENDATIONS AND IMPLEMENTATION SCHEDULE

Based on the information collected and financial analysis performed SCS offers the following conclusions and recommendations:

CONCLUSIONS:

- The estimated cost to develop the proposed MRF at the City's transfer station is approximately \$11.8 million.
- The estimated annual operations and maintenance costs for the MRF will very likely exceed the projected revenue from sales of materials in the first five years of operation.
- Potential for increased revenue in the future is substantial given the available waste stream in the region and recent pricing of some materials.

RECOMMENDATIONS:

1. Determine based on the financial analysis and other factors models if the City and Fort Hood wants to continue pursuit of construction and operation of a regional Material Recovery Facility.
2. Apply for the DEAAAG from the State in the spring if the intent is to move forward with development.
3. Update the financial analysis after the grant process and additional input from surrounding Cities.
4. Further refine institutional arrangements for the operation of the facility. Consider developing a revenue/cost sharing agreement for the MRF with Fort Hood.
5. Review the implementation of curbside recycling to determine the cost impact to customers if implemented.
6. Consider implementing a limited commercial recycling program as an alternative to residential curbside recycling to enhance revenue with limited capital investment.

7.1 IMPLEMENTATION SCHEDULE

Exhibit 12. Plan Implementation Schedule

Recommendations	Fiscal Years																	
	2016 Jan - Dec									2017 Jan - Sept								
Design	■	■	■	■	■	■												
Construction							■	■	■	■	■	■	■					
Single Stream Collection												■	■	■				
Operations														■	■	■	■	■
Commercial Recycling																	■	■

The implementation schedule assumes that project implementation begins at the conclusion of this study in the first quarter of 2016.

GRANT FUNDING INFORMATION

Defense
Economic
Adjustment
Assistance
Grant
Program
(DEAAG)

The Defense Economic Adjustment Assistance Grant Program (DEAAG) is an infrastructure grant program designed to assist defense communities that are responding to or recovering from a reduction or termination of defense contracts, and those that have been positively affected with new or expanded military missions, as well as, qualified job retention.

DEAAG funding is available to local municipalities, counties, defense base development authority, junior college districts and Texas State Technical College campuses, and regional planning commissions representing these communities.

Funding can be used for negatively and positively affected communities or for proactive projects that will increase the military value of the installation. Projects can include the purchase of Department of Defense property, new construction or rehabilitation of facilities in support of job creating projects and opportunities. Additionally, funds can be awarded to Public Junior Colleges or Texas State Technical College System for the purchase or leasing of capital equipment for the purpose of (re)training displaced defense workers.

Grants awarded may range from \$50,000 to \$2 million per project. The Texas Military Preparedness Commission has awarded \$32 million in 40 grants since the program inception in 1997. The average award is \$800,601.

Examples of past awards include the reconstruction of water and wastewater systems, the replacement of rail and rail bed, and upgrading a building to accommodate indoor engine testing capabilities.

For information on prior Historical Pricing call 1-877-825-6555.

* Rows highlighted in yellow indicate that the price changed on that date

Notes:

This chart represents prices recyclers are paying for loose material. The data is intended to reflect pricing trends in all regions. Prices listed are in U.S. dollars per ton delivered to the door, unless otherwise noted.

Historical Data summarizes the low, median and high prices, including National averages.

Price ranges are the result of information provided weekly by the industry and do not reflect the opinions of the publisher. This index is for reference purposes only and does not infer the commitment to buy or sell at the reported price.

Subscribers are urged to use several industry price indexes available in combination with the above referenced prices in gaining a broader information and polling base when tracking numbers. While any one single index can provide useful information to the reader, it cannot capture buying, selling or production practices that are unique to any given business.

For information on prior Historical Pricing call 1-877-825-6555

*** Rows highlighted in yellow indicate that the price changed on that date**

Notes:

This chart represents prices recyclers are paying for loose material. The data is intended to reflect pricing trends in all regions. Prices listed are in U.S. dollars per ton delivered to the door, unless otherwise noted.

Historical Data summarizes the low, median and high prices, including National averages.

Price ranges are the result of information provided weekly by the industry and do not reflect the opinions of the publisher. This index is for reference purposes only and does not infer the commitment to buy or sell at the reported price.

Subscribers are urged to use several industry price indexes available in combination with the above referenced prices in gaining a broader information and polling base when tracking numbers. While any one single index can provide useful information to the reader, it cannot capture buying, selling or production practices that are unique to any given business.

For information on prior Historical Pricing call 1-877-825-6555

*** Rows highlighted in yellow indicate that the price changed on that date**

Notes:

This chart represents prices recyclers are paying for loose material. The data is intended to reflect pricing trends in all regions. Prices listed are in U.S. dollars per ton delivered to the door, unless otherwise noted.

Historical Data summarizes the low, median and high prices, including National averages.

Price ranges are the result of information provided weekly by the industry and do not reflect the opinions of the publisher. This index is for reference purposes only and does not infer the commitment to buy or sell at the reported

price.

Subscribers are urged to use several industry price indexes available in combination with the above referenced prices in gaining a broader information and polling base when tracking numbers. While any one single index can provide useful information to the reader, it cannot capture buying, selling or production practices that are unique to any given business.

*** Rows highlighted in yellow indicate that the price changed on that date**

Notes:

This chart represents prices recyclers are paying for loose material. The data is intended to reflect pricing trends in all regions. Prices listed are in U.S. dollars per ton delivered to the door, unless otherwise noted.

Historical Data summarizes the low, median and high prices, including National averages.

Price ranges are the result of information provided weekly by the industry and do not reflect the opinions of the publisher. This index is for reference purposes only and does not infer the commitment to buy or sell at the reported price.

Subscribers are urged to use several industry price indexes available in combination with the above referenced prices in gaining a broader information and polling base when tracking numbers. While any one single index can provide useful information to the reader, it cannot capture buying, selling or production practices that are unique to any given business.

*** Rows highlighted in yellow indicate that the price changed on that date**

Notes:

This chart represents prices recyclers are paying for loose material. The data is intended to reflect pricing trends in all regions. Prices listed are in U.S. dollars per ton delivered to the door, unless otherwise noted.

Historical Data summarizes the low, median and high prices, including National averages.

Price ranges are the result of information provided weekly by the industry and do not reflect the opinions of the publisher. This index is for reference purposes only and does not infer the commitment to buy or sell at the reported price.

Subscribers are urged to use several industry price indexes available in combination with the above referenced prices in gaining a broader information and polling base when tracking numbers. While any one single index can provide useful information to the reader, it cannot capture buying, selling or production practices that are unique to any given business.

* Rows highlighted in yellow indicate that the price changed on that date

Notes:

Grades and preparation of baled materials are as defined in the most recent Paper Stock Institute of America Standards and Practices PS Circular.

Prices are F.O.B. seller's dock in trailerload/carload quantities and do not reflect variances such as: spot loads, premiums, freight allowances, regular quantity shipments, contract terms, etc.

Price ranges are the result of information provided weekly by the industry and do not reflect the opinions of the publisher. This index is for reference purposes only and does not infer any commitment to buy or sell at the reported price.

Subscribers are urged to use several industry price indexes available in combination with the above referenced prices in gaining a broader information and polling base when tracking numbers. While any one single index can provide useful information to the reader, it cannot capture buying, selling or production practices that are unique to any given business.

* Rows highlighted in yellow indicate that the price changed on that date

Notes:

Grades and preparation of baled materials are as defined in the most recent Paper Stock Institute of America Standards and Practices PS Circular.

Prices are F.O.B. seller's dock in trailerload/carload quantities and do not reflect variances such as: spot loads, premiums, freight allowances, regular quantity shipments, contract terms, etc.

Price ranges are the result of information provided weekly by the industry and do not reflect the opinions of the publisher. This index is for reference purposes only and does not infer any commitment to buy or sell at the reported price.

Subscribers are urged to use several industry price indexes available in combination with the above referenced prices in gaining a broader information and polling base when tracking numbers. While any one single index can provide useful information to the reader, it cannot capture buying, selling or production practices that are unique to any given business.
