

INTEROFFICE MEMORANDUM

To: Kent Cagle, City Manager

FROM: Jeffery Reynolds, Executive Director of Public Works

DATE: April 25, 2023

SUBJECT: **Little Nolan Creek (Cunningham Road) Paint Spill Emergency Declaration**

On Thursday, March 23, 2023, a vehicle traveling on Cunningham Road was carrying 5-gallon buckets of paint when three (3) fell from the vehicle. The buckets broke and the individual(s) tossed the paint with the buckets into Little Nolan Creek. This event caused the water to become contaminated and needed to be investigated.

Mr. Joe Stuart (Emergency Management & Response Coordinator) arrived on the scene and reached out to Engineering for environmental assistance. CG Environmental, a third-party company was called out for samples and to handle waste removal. A Texas Commission on Environmental Quality (TCEQ) representative came out and approved the remediation method.

As this had affected our waterway, it was imperative to act immediately to test and resolve the issue. We are asking for an emergency declaration to pay CG Environmental for the testing and waste removal.

Jeffery Reynolds
Executive Director of Public Works
