In such cases, a tee or circle turnaround that meets the minimum standards, as shown below, will be required.

In all cases, approach design should facilitate a looping or circle ingress/egress path that avoids necessity of collection vehicle having to conduct backing maneuvers as much as possible.

(jh) Whenever, in the opinion of the solid waste director or designee, a dumpster or screen cannot be located upon a particular site so as to conform with these requirements, or there are special circumstances which make the requirements wholly impracticable, the solid waste director or designee may designate a location for the dumpster which in their discretion is the most accessible and aesthetically appropriate or make exemptions from the requirements as necessary.
