**Subject:** Item for workshop agenda

I would like placed on this Tuesdays workshop for discussion and consensus

1. To discuss and appoint an adhoc committee with citizen input to look into possible out sourcing of the entire KFD Ems operations to include all ambulance services.
2. If out sourcing is viable for this function advertising for bids for full-time private ambulance services.
3. We recently outsourced EMS billing where historically we collected pennies on the dollars billed.
4. If our effort to provide the same or better service for lower cost to our tax payers I believe it worth exploring.
5. Recently there have been public concerns raised about overtime and ambulances ... This action if viable would address both issues and possibly allow the EMT's to be re assigned to prevent overtime and to possibly provide highly trained staff as we continue to address needs for more fire station locations in our growing city.

Dick Young
