

# 2018 MINOR CIP DRAINAGE IMPROVEMENT PROJECTS CONSTRUCTION CONTRACT

RS-18-070

August 21, 2018

# Background and Conclusion

- The Bermuda Ditch portion of this project is the replacement of the failed vertical channel wall located behind Linda Spur. The 2005 Drainage Master Plan identified a large area along Bermuda and Ronstan Ditches for proposed improvements as the highest priority of all the capital improvements. Two of the four identified sub-projects in this area have already been completed. This project will also address the sewer line failure repairs in Cosper Ridge.
- Four contractors submitted bids on August 1, 2018.
- TTG Utilities, LP was the apparent low responsive bidder with a bid of \$486,696.
- The original project estimate was \$678,502 for this project.
- Funding for this project is available in the Drainage 2006 CO Bond and the Drainage Utility Fund CIP.

# Alternatives

1. Award a construction contract to TTG Utilities, LP. This alternative will allow the project to be completed.
2. Reject bids to abandon the project.
3. Re-scope and re-bid the project to add or eliminate aspects of the project. This alternative would likely result in higher expenses for the project.

# Recommendation

- Staff recommends that the City Council authorize the City Manager or designee to enter into an agreement with TTG Utilities, LP for a construction contract to build 2018 Minor CIP Drainage Improvement Projects for the amount of \$486,696.
- Staff recommends that the City Manager or designee is expressly authorized to execute any and all changes to this contract within amounts set by state and local law.
