

SEWER LINE REHAB PHASE 4

INSITUFORM TECHNOLOGIES

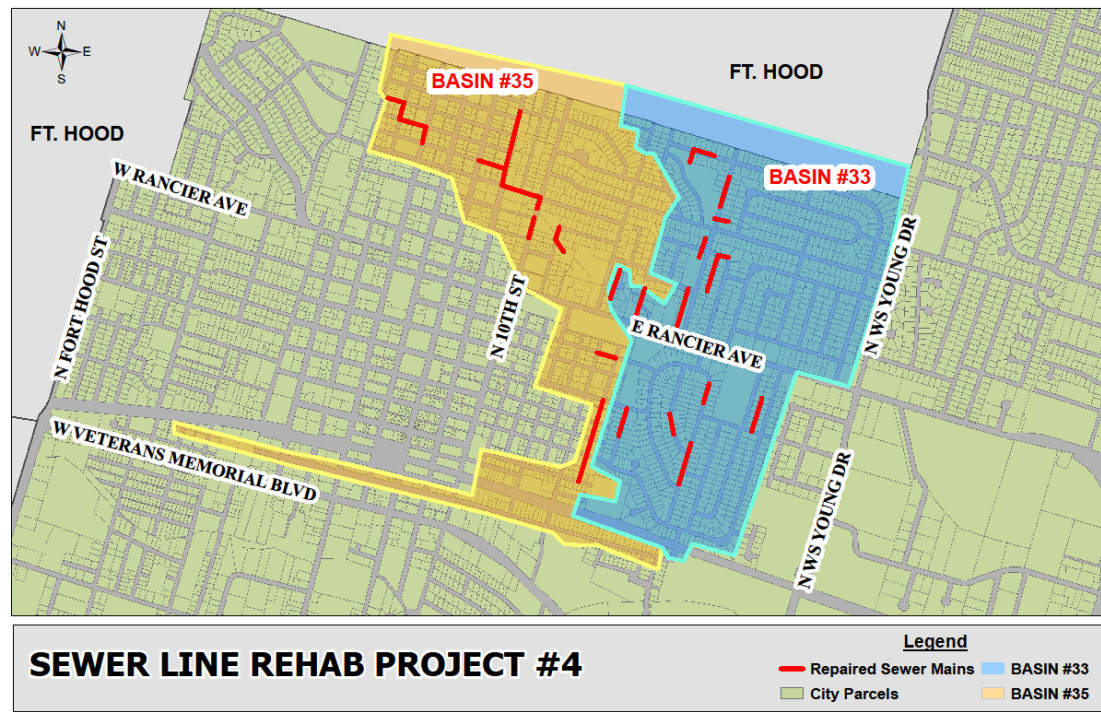

RS-19-030

March 5, 2019

Background

2

- Phase 4 of the Sanitary Sewer Evaluation Survey recommends the rehabilitation of 15,573 feet of sewer main.
- Insituform Technologies has submitted a Texas BuyBoard proposal in the amount of \$1,794,915 to complete this project.
- Insituform Technologies has done an outstanding job rehabilitating over 25,000 feet of sewer main for the City in the past seven years.
- Funding for this project is available in the 2013 Water and Sewer Bond.

3

Project Locations

Located primarily in Basin #33 and Basin #35.

Alternatives

4

- City crews rehabilitate all 15,573 feet of sewer main.
 - ▣ This is outside of the normal workload for our sewer crews.
- Delay this project.
 - ▣ Could lead to failure of portions of our sewer system.
- Award this contract to Insituform Technologies.

Recommendation

5

- City staff recommends that the City Council authorize the City Manager to enter into an agreement with Insituform Technologies for a construction contract to rehabilitate 15,573 feet of sewer main for the amount of \$1,794,915.
