Miles from Fire Station: Approximately 1.77 miles from Fire Station No. 5, which is located at 905 W. Jasper Road.

Water, Sewer and Drainage Services:

Adequate potable water and sanitary sewer capacity are available to the current residence on the property. Public storm drainage infrastructure lies within the abutting right-of-way. Detention of post development storm water runoff may be required if the property is converted to commercial use and inadequate capacity remains within existing drainage infrastructure. Public Works personnel have performed only a basic assessment of publicly-dedicated water and sanitary sewer infrastructure that would serve this property. The property owner and his agents are cautioned that unknown or unforeseen site conditions may require remedial action to provide safe and adequate water, sewer, or drainage service to the property. Further, City of Killeen development regulations require that capacity analyses related to development of the property are the sole responsibility of the owner. Transportation:

Existing conditions: The property is located at the southwest corner of the signalized T-intersection of Jasper

Drive and Trimmier Road. Jasper Drive and Trimmier Road are respectively classified as a 70' collector and 90' minor arterial on the City's adopted Thoroughfare Plan. The Trimmier Road Improvements CIP is currently under construction, which includes mobility enhancements as a part of the future project. A right-of-way taking may affect the property. Ingress/egress to the property would be limited to the single point of existing ingress/egress to Jasper Road. A discrete drive to Trimmier Road would not be allowed.

Proposed Improvements: None proposed as part of this development.

Projected Traffic Generation: The traffic impact will be minimal.

Environmental Assessment

Topography: The property has an elevation of 906'. The soils for the site are classified as follows: approximately 32 percent Topsey clay loam with 3 to 8 percent slopes (BtC2) and approximately 68 percent Denton silty clay with 1 to 3 percent slopes (DeB). There are no known wetlands on this parcel. The 1964 Drainage requirements will apply to any new development on this parcel.

Currently sheet flow runoff on this development flows from the rear of the parcel to the adjacent parcel to the south and then into Trimmier Road and other rights-of-ways prior to entering Trimmier Road Ditch. The runoff then flows from Trimmier Road Ditch into Little Nolan Creek. Little Nolan Creek flows into Nolan Creek prior to leaving the City. Little Nolan Creek and Nolan Creek are currently listed on the TCEQ's 2012 303(d) water quality list for impairment due to bacteria and concerns for near non-attainment for nutrients.

Regulated Floodplain/Floodway/Creek: The proposed development is not within any FEMA regulatory Special Flood Hazard Area (SFHA).

Land Use Plan: The property is designated as 'General Residential' on the Future Land Use Map (FLUM) a component of the Comprehensive Plan.

Plan Recommendation: The Comprehensive Plan considers 'General Residential' to be of a medium intensity category/character that encompasses detached residential dwelling units, attached housing types, planned developments, as well as parks and public/institutional places. Neighborhood-scale commercial uses are expected to emerge over time and should be encouraged on sites, and in locations, within or near the edge of "General Residential" areas.

Consistency: The rezone request is consistent with the Comprehensive Plan.

Public Notification

Staff notified sixteen (16) surrounding property owners within the 200' notification area. Staff has received no protests.

The Planning and Zoning Commission recommended approval of "B-2" (Local Retail District) zoning for this site by a vote of 5 to 1 with Commissioner Harkin in opposition. Commissioner Dorroh abstained from this vote. This property is located at the corner of a busy signalized intersection and is an appropriate site for low-scale general office and local retail use.
