Infrastructure and Community Facilities

Water, Sewer and Drainage Services:

Provider: City of Killeen

Within Service Area: Yes

Feasibility Study or Service Commitment: Water and sewer infrastructure is immediately available to the property. The property owners and their agents are cautioned that unknown or unforeseen site conditions may require remedial action to provide safe and adequate water, sewer, or drainage service to the property. Further, City of Killeen development regulations require that capacity analyses related to development of the property are the sole responsibility of the owner. The owner or his agents, acting as the permit applicant for the subject property, shall coordinate tie-in to all publicly dedicated infrastructure with the Public Works Department.

Transportation:

Existing conditions: Old FM 440 is classified as a 70' collector street on the City's adopted Thoroughfare Plan.

Proposed Improvements: There are no improvements planned at this time.

Projected Traffic Generation: A 4,000 square feet automotive shop will generate 95 vehicle trips per day (Note -this data is sourced from the Institute of Transportation Engineer (ITE) Trip Generation Rates-9th Edition, provided through Spack Consulting).

Environmental Assessment

Topography/Regulated Floodplain/Floodway/Creek: The property ranges in elevation from 938 to 944 feet. The parcel is adjacent to an undeveloped drainage easement to the east and a Special Flood Hazard Area (SFHA) to the south. Approximately 0.2 acres of the approximate two acres in this zoning case are located within a regulated SFHA. Current City codes require the establishment of a creek buffer zone (CBZ) along Trimmier Road Ditch that will span a distance of 25' beyond the top of each bank. A CBZ may be required at the time of platting.

Currently, sheet flow runoff on this development enters Trimmier Road Ditch, southeast of the subdivision boundary. Trimmier Road Ditch flows into Little Nolan Creek and then into Nolan Creek prior to leaving the City. Both Little Nolan Creek and Nolan Creek are currently listed on the TCEQ's current 303(d) water quality list for impairment due to bacteria and concerns for near non-attainment for nutrients.
